EXTREME HEAT POLICY

XLVIII. EXTREME HEAT

The OSSAA recognizes that heat related illness is the leading cause of preventable death in high school students participating in activities. The Board adopted the following policies:

Acclimatization Period: Whenever students are participating in an environment in which the temperature cannot be controlled there should be acclimatization period. The acclimatization period is defined as the first 14 days of participation beginning with the first date of practice in that sport or activity, or the first date a participant begins practice, whichever is later. Any speed, strength, or conditioning programs shall not be considered a part of the acclimatization period. All students participating in athletics or activities, including those who arrive to preseason practice after the first day of practice, are required to follow the guidelines of the first days of the acclimatization period.

All athletic coaches and marching band directors are required to view *A Guide to Heat Acclimatization and Heat Illness Prevention* at www.nfhslearn.com, annually. A certificate of completion shall be kept on file for each coach or marching band director at the member school.

Practices should be separated by at least one hour, where there is no physical activity between the end of the first practice and the beginning of the second practice.

SPORTSMANSHIP

The OSSAA's vision for sportsmanship is built on expectations. Expectations that the school community—administrators, teachers, coaches, students, and patrons strive for displaying only positive behavior and good sportsmanship in everything they do at all interscholastic contests.

As educators we have the unique opportunity to teach the value of discipline, dignity, integrity, fairness and respect to young people each day.

We encourage all school personnel to take advantage of the opportunity and make a lasting difference.
